

International Conference

A row of ten white offshore wind turbines stands on a blue sea under a clear blue sky.

Building up **together**  
the **future** of innovation

September 23-24-25, 2015

Océanopolis, Brest

## Building together the future of innovation

- A time to share thoughts and ideas on the interactions occurring between laboratories and companies and their outcomes
- A place to meet for people coming from the research and the economic background.
- A place to build news synergies for the future

CO-SCIENCES International conference aims to:

Highlight the diversity of interactions which imply various disciplines and economic sectors.

Reflect upon the material and cultural productions which result from them.

Build a common vision for tomorrow.

### Call for papers

You have an expertise in the field of science-business interactions? You have led a research or a program on a specific field or object, or developed an original methodology? Your opinion interests us !

You are or have been a member of a partnership/consortium gathering one or more labs and one or more companies ? Clusters, platform for economic development and innovation ? Come to share your experience !

### Proposal on poster or oral communication due to May 31<sup>th</sup>, 2015
